

# Project Management

# Two Views

Planning, organizing, and managing resources to achieve specific project, to respect constraints: scope, time and budget.

Operation, repetitive, permanent, or semi permanent functional activities to produce products or services, to optimize and integrate the inputs necessary to meet pre defined objectives.

# Approach

- Traditional approach
- Critical chain project management
- Extreme project management
- Event chain methodology
- Process-based management
- Agile project management

# Process

- Planning and design
- Executing
- Monitoring and Controlling
- Closing
- Project controlling and control systems
