

Web 3.0

Asynchronous is the rule

Definitions

Synchronous : actions occurring or existing at the same time

Asynchronous : absence of synchronism

in practice on Web

Synchronous

to surf the web browser are using, these allow you to LOAD a page (eg html) containing information.

This information is updated and/or modified at runtime, but these changes are only visible after RELOAD of the page and following the expiry time of the cache of the browser and proxy system.

So to see new information you have to RELOAD the page.

Asynchronous

When information is updated and/or modified at runtime changes are visible WITHOUT need to reload of the page and WITHOUT following the expiry time of the cache of the browser and operating system.

Web 3.0

Asynchronous SERVICES

just some Asynchronous SERVICES

Web Conference : video streaming, slideshow, chat...more

Social Comunication: social live video chat...more

Web Game: multi participants live games...more

Web 3.0

Asynchronous TOOLS

just some Asynchronous TOOLS

Virtual Board (eg. field : web iLearning virtual classroom)

professor web page

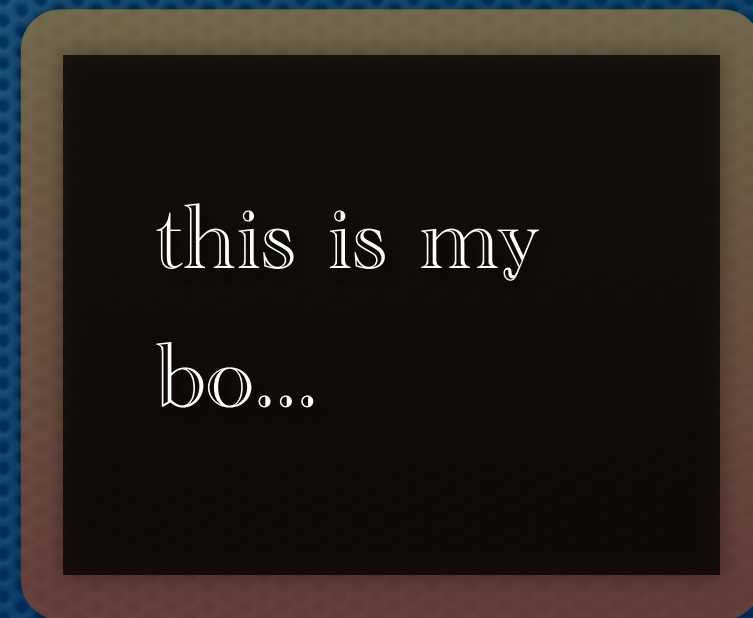

professor write on board

asynch

student web page

student visualize on board in real time

just some Asynchronous TOOLS

Virtual Canvas (eg. field : web meeting)

host web page

host draw on canvas

asynch

participants web page

participant visualize
on canvas in real time

just some Asynchronous TOOLS

Virtual Classroom

professor & student web page

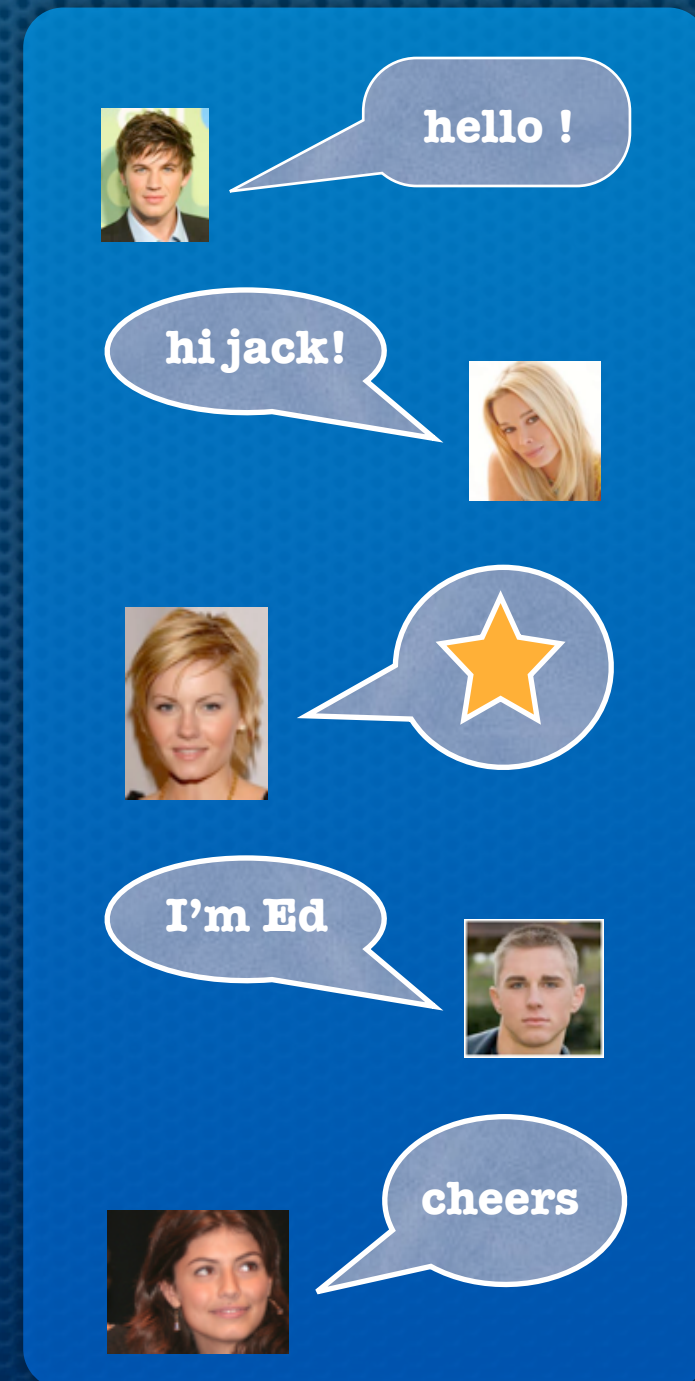

just some Asynchronous TOOLS

Live Chat

chat web page

chat participants

just some Asynchronous TOOLS

Live TV video Game

just some Asynchronous TOOLS

Live Game

player A web page

asynch

player B web page

Web 3.0

Asynchronous NO LIMITS

asynchronous NO LIMITS

asynchrony is the future

asynchrony is the basic rule

asynchrony allows any interaction

asynchrony is for all

asynchrony is real time

Web 3.0

Asynchronous MORE FEATURES

asynchronous MORE FEATURES

asynchrony in real time:

multi user management

centralized and distributed DB management

management online system

management IT and TLC
